ABOUT

- Motivated Computer Engineering student (Expected 2026) specialising in Data Analytics, Machine Learning, and Business Intelligence, with a track record of turning raw data into actionable insights using Power BI, Python, and SQL, backed by strong analytical thinking and a deadline-driven work ethic.
- Hands-on experience building end-to-end ML pipelines — from data cleaning and feature engineering to model comparison and deployment. Recognised with a Gold Medal at Imarticus Learning and 1st Rank in the PAN India Data Science Hackathon (2026). Seeking a Data Scientist / Data Analyst role to drive data-informed decisions.

CORE COMPETENCIES

- Machine Learning & Statistics: Logistic Regression, Random Forest, Decision Tree, XGBoost, Isolation Forest, PCA, Clustering, Hyperparameter Tuning, Model Evaluation (F1, Precision, Recall, Accuracy)
- Data Analysis & Visualisation: Exploratory Data Analysis (EDA), Data Cleaning, Feature Engineering, Outlier Detection, Correlation Analysis, Power BI, DAX, Tableau, Excel
- Programming & Tools: Python (Pandas, NumPy, Matplotlib, Seaborn, scikit-learn), SQL Server, Git, GitHub, Jupyter Notebook, VS Code, React
- Advanced: Hyperparameter Tuning (Grid Search, Randomized Search), NLP, Text Processing, ANN, CNN, Gradient Descent

CERTIFICATIONS & EDUCATION

- Data Analytics with Python – Coursera (2025)
- Introduction to Machine Learning – Google for Education (2024)
- B.Tech in Computer Engineering – Yadavrao Tasgaonkar Institute of Engineering & Technology (Expected 2026) | CGPA: 7.43
- Diploma in Computer Engineering – Government Polytechnic, Vikramgad, Mumbai (2023) | 76.69%

PROFESSIONAL EXPERIENCE

Data Science & Analytics Intern – Imarticus Learning (Yadavrao Tasgaonkar Institute)

Mar 2025 – Apr 2025

- Built interactive Power BI dashboards for analytics reporting; cleaned and modelled 15,000+ records using Pandas, SQL, and Excel, improving data quality and reducing inconsistencies by 30%.
- Applied statistical techniques to uncover patterns in complex datasets and delivered actionable insights through visual reports; awarded Gold Medal for top performance during the internship.

Web Development Intern – Sumago InfoTech

Jul 2023 – Sep 2023

- Designed and developed a responsive full-stack website using HTML, CSS, JavaScript, Python, and SQL, featuring interactive UI components and seamless back-end integration.

KEY PROJECTS

FraudGuard – Fraud Detection System

Jan 2026

- Engineered a dual-track ML pipeline for near real-time fraud detection (~15 sec inference): Track A uses Isolation Forest + XGBoost for fast anomaly classification; Track B trains Random Forest, Logistic Regression & Decision Tree in parallel with automated F1 / precision / recall comparison.
- Built a React dashboard with a live Fraud Transaction Table and Model Comparison charts. Stack: Python · scikit-learn · XGBoost · Pandas · NumPy · React.

Smart Career Recommendation System

Nov 2025

- Developed an ML-based web application recommending career paths across 20+ categories based on user skills, interests, and academic performance using multi-class classification models.
- Designed a user-friendly interface enabling students to receive personalised, data-driven career guidance based on their academic and skill profiles.

Accident Analysis Dashboard – Power BI

Apr 2025

- Designed an interactive Power BI dashboard analysing road accident trends by road condition, time, and geography using DAX measures and data modelling, enabling evidence-based safety decisions.

Employee Wellness Analysis – EDA

Dec 2024

- Performed Exploratory Data Analysis on wellness and productivity datasets using Pandas, Matplotlib, and Seaborn; uncovered key correlations between work-life balance metrics and employee performance scores.

TECHNICAL SKILLS

Python: Pandas, NumPy, Matplotlib, Seaborn, scikit-learn, XGBoost | **Data Cleaning:** Missing values, duplicates, outliers, feature scaling

EDA: Charts, summaries, correlation analysis, pattern detection | **ML:** Classification, anomaly detection, ensemble methods, model tuning

Statistics: Hypothesis Testing, Z-test, T-test, Chi-square, ANOVA | **SQL:** Query writing, data extraction, joins, aggregations

Power BI: Dashboards, DAX, data modelling, visual reports | **Excel:** Formulas, pivot tables, charts, conditional formatting

Tableau: Visual analytics, interactive dashboards | **Tools:** Git, GitHub, Jupyter Notebook, VS Code, React

NLP & Deep Learning: Text processing, ANN, CNN concepts, Gradient Descent

PROFESSIONAL SKILLS

Strong analytical thinking and problem-solving | Clear communication of data insights to non-technical stakeholders | Excellent teamwork and collaboration | Proven leadership and event organisation | Strong work ethic with exceptional organisational and time-management skills

AWARDS & ACHIEVEMENTS

Gold Medal – Data Science & Analytics Internship, Imarticus Learning (2025) | 1st Rank – Data Science PAN India Hackathon, Imarticus Learning (2026) | 2nd Runner-Up – Mumbai University Hackathon (2026) | Organiser – TechSagar Hackathon, Yadavrao Tasgaonkar College (2026)

EXTRACURRICULAR ACTIVITIES

Participated in Palghar District Singing Competition (2015) | Winner – State Level Science Exhibition (2018) | Participated in Marathon Run (2017)

PERSONAL INFORMATION

Date of Birth: May 16, 2004 | Languages: English, Marathi, Hindi (R/W/S) | Hobbies: Singing, Reading
